## **Clark Forklift**

Performing globally, there are at this time 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those in commission in North America. Clark has five main lines of forklifts across the globe, making it one of the most expansive companies in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, duel fuel, petrol, LPG, hand-driven trucks, narrowaisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 individual components built for 20 unique designs of forklifts and automated equipment. Your local Clark Dealer is your total source for availability of all your components requirements offered by Clark Totalift.

Clark features a exceptional Parts Supply team. The components warehouses are conveniently stationed in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Driven to offer the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Globally, Clark has one of the most amazing supplier support networks. With over 550 locations worldwide, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their clients predominates the materials handling market.

Clark proudly remains an innovative leader of the industrial equipment industry, revolutionizing protection features such as the worker restraint system. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark's continual mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first lift truck maker across the globe to be certified with the internationally approved quality standard ISO 9001 for every one of their production facilities. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any environmental restrictions, thus placing them in a dominant industry position.

## Supply Efficient Production

Clark has chosen the particularly economical and beneficial system of "Lean Manufacturing" for its assembly facilities and application of resources. This system was established to acknowledge the most efficient approaches of production plant management and ensuring maximum proficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

## Engine Design

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing expenses. The new value engineering program combines modern product growth and delivers superior client support and service within the industry.
