Kamloops Manlift Operator Certification

Kamloops Manlift Operator Certification - Our aerial lift and scissor platform certification and training empowers those participating with a knowledge and general understanding of the efficient and safe utilization of "Power Operated Mobile Work Platforms," under all of the current regulations in the business. Upon successful completion of training, the participants would be able to know and understand certain safety and health related dangers associated with operating aerial and scissor lifts.

There are various affiliated locations within your area providing Manlift Operator Certification Programs. Trainees are provided with in-depth instruction about safe utilization and rules along with extensive hands-on training. The level of skill and knowledge of each trainee is assessed and individuals who are capable of demonstrating a satisfactory level of operational ability would receive Operator Certification cards and employee documentation.

Theory Training
The trainer guides trainees through an interactive and comprehensive review during the theory training. The operator manual is studied that includes all relevant regulations. Other subject matters like for instance safe operating measures, various machine kinds in addition to various sizes and associated applications, pre-use inspections and general work place safety are individually explored.

Theory Evaluation
The evaluation of the theory parts begins with a written test, which focuses on the course concepts that was covered in the reference handbook. Exams are graded and returned to the trainee. The exams are then reviewed to guarantee understanding and a score of at least 70% is considered necessary in order to pass this part of the training.

Practical Training
The hands-on portion of the course is covered in the practical training. Here, those training are shown the safe operating procedures, the parking and shutdown procedures and the pre-use check procedures. Each trainee has the chance to operate the equipment and practice the skills they learned throughout Theory Training under the helpful eye of the program trainer in an environment which is safety controlled.

Practical Evaluation
The assessment of the practical part is where the trainee is evaluated as to whether they have the minimum level of skill. Trainees are individually tested on their skills using the machine in a somewhat challenging course environment. When the evaluation is complete, the trainees are de-briefed and given the opportunity to address any issues they may have regarding whichever portion of the course. Every employer of a successful trainee will be sent the official documents and records soon after the course has been finished.
